EXPERIENCE

Full-Stack Developer | DoersCircle

Aug 2025 – Present

- Architected and maintained a full-stack TypeScript platform using Hono 4.x, AWS Lambda, PostgreSQL, Redis, and Serverless Framework.
- Developed and launched platform modules including Events, Masterclasses, Guides, Layoffs, Terms Conditions, and About Us, and more through a custom CMS workflow.
- Implemented Role-Based Access Control (RBAC) across admin and user applications, securing premium membership tiers and gated resources.
- Designed secure JWT authentication, Stripe subscription billing workflows, and backend content-gating mechanisms.
- Built transactional email systems using Mailgun and Mailchimp-Mandrill and integrated Prismic CMS for content management.
- Implemented analytics reporting and export tooling using Mixpanel for operational insights.

Frontend Developer | F22 Labs

Oct 2023 – Aug 2025

- Developed villa booking and reservation platforms using Next.js, TypeScript, TailwindCSS, Google Maps, and Razorpay payment integration.
- Built BLE-enabled mobile applications with secure device communication, Firebase notifications, and location-based services using Flutter.
- Improved user experience and application performance, increasing average session duration by 15%.
- Managed Android and iOS application deployments using Android Studio, Xcode, and App Store Connect.
- Delivered production-ready features across web and mobile platforms while working closely with product, design, and backend teams.

- Received Most Valuable Player (MVP) Award for consistent high-impact project delivery.

Software Developer | Web3 Citadel

May 2022 – Sep 2023

- Delivered performant and responsive web applications using React, Next.js, and TailwindCSS, improving load times and user engagement by 30%.
- Integrated MetaMask wallet authentication, Stripe payments, Ethereum payments, and OAuth login systems into a carbon credit marketplace.
- Built Flutter camera modules with ARCore-powered augmented reality features to enhance user interaction.
- Worked in Agile teams with strong emphasis on performance, maintainability, and responsive design.

PROJECTS

Doerscircle | Typescript, Next.js, AWS Lambda, Redis, Stripe

2025

- Designed automated data synchronization workflows between admin and user-facing systems for events, masterclasses, guides, and legal content.
- Engineered gated-access architecture for premium resources using JWT-scoped authorization and subscription-based access control.

Villa Booking Platform | Next.js, TailwindCSS, Razorpay, Mixpanel

2024

- Built a responsive villa booking platform with dynamic search, booking management, Razorpay payments, and behavioral analytics integration.

Financial EdTech Platform | Next.js, Razorpay

2024

- Developed a course purchasing platform with peer networking, discussion forums, and integrated payment workflows.
- Implemented MetaMask wallet integration, Ethereum and Stripe payments, OAuth authentication, and advanced filtering for a blockchain-based carbon credit marketplace.
